Core Design Features

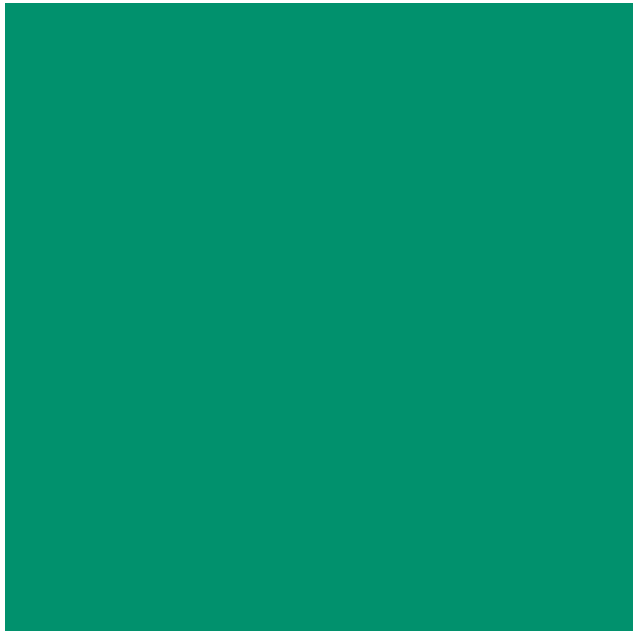

5-2 Colors

5-2-1 Corporate Color

The core color of the Fujifilm Group is Fujifilm Advanced Green.

As our corporate color, Fujifilm Advanced Green expresses advanced creativity and consideration for people and the environment, while reinforcing the image of the Fujifilm Group.

Fujifilm Advanced Green

Reference

CMYK	RGB
C : 90%	R : 1
M : 0%	G : 145
Y : 70%	B : 109

Expresses advanced creativity and consideration for people and the environment

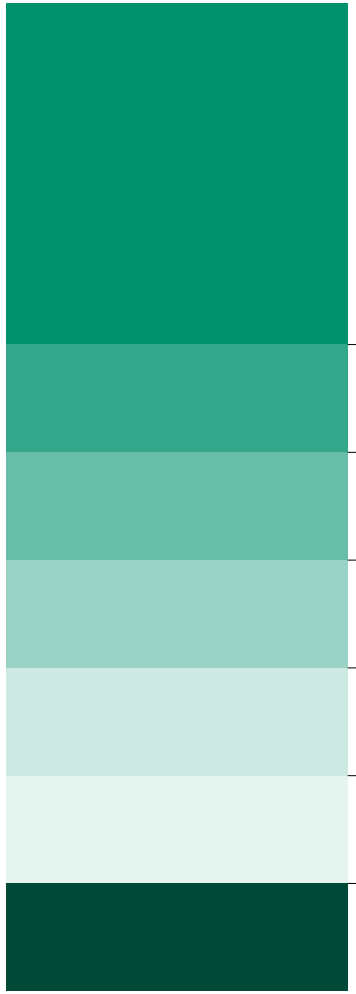

※When CMYK and RGB are not supported
Fujifilm Advanced Green : PANTONE 3278 C

5-2-2 Color Palette: Primary Colors

The primary colors are used in communication media (e.g., product catalogs and presentation materials) that present and create the image of the Fujifilm brand.

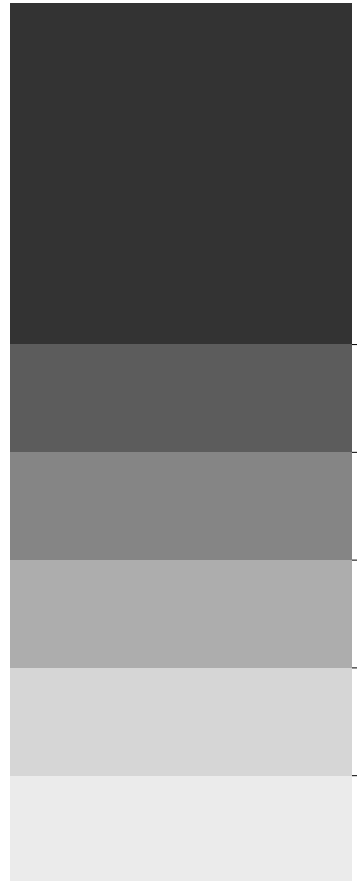

Fujifilm Advanced Green and Innovative Grey should be used to create a consistent brand image.

5-2-2 Color Palette: Primary Colors Examples

On the right are examples of how to use the primary colors.

As much as possible, use only the primary colors in designs.

Use Fujifilm Advanced Green and Innovative Grey effectively according to the content you wish to convey. For example, only the title of the text or text to be emphasized should be shown in Fujifilm Advanced Green. In the representation of a graph, show our information and items to be emphasized in Fujifilm Advanced Green and other items in Innovative Grey, etc.

In addition, appropriate shades of the colors should be used based on the usage and situation.

Text color and background color should be carefully selected to ensure the designs have good readability for their target audiences. Please ensure that the color scheme can be easily distinguished by all target audiences. (*Accessibility*)

Different shades of the colors can also be used, as shown on the previous page.

Text designs

Social Contribution Activities

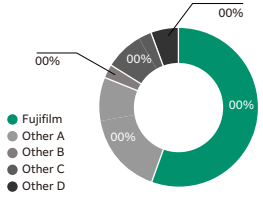

The Fujifilm Group contributes to society through its business operations while interacting proactively with local communities as a corporate citizen, thereby contributing to the sustainable development of society. Utilizing the unique characteristics of our business operations, the Fujifilm Group implements distinctive activities that include creating archives of cultural assets and artistic works (record storage), reproducing historical documents, providing medical devices for use at disaster sites and by emerging nations, and support through photography. In addition to these activities, we participate in various other activities to support education and foster coexistence with communities.

Initiatives to Promote Quality Management

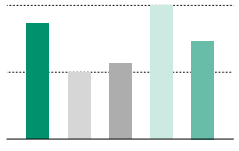

Fujifilm was established for the purpose of producing photographic film in Japan. Photographic film is not a product that customers can try before they decide whether to purchase it; it is a product that is purchased based on the trust that beautiful images can be created. Since its foundation, Fujifilm has continued to provide uniform, high-quality products that our customers can trust as the cornerstone of our business activities, and we have also promoted this as a way to contribute to society.

5-2-2 Color Palette: Secondary Colors

Secondary colors are for use with Fujifilm Advanced Green and Innovative Grey when categorization or discernment is needed.

The secondary colors do not symbolize the Fujifilm brand. However, they should be used when the primary colors alone cannot achieve the desired categorization or discernment and multiple colors are needed in communication media (e.g., catalogs, presentation materials).

5-2-2 Color Palette: Recommended Usage (Primary and Secondary Colors)

Shown on the right are examples of how to use the primary and secondary colors. Follow the steps to select and use a color from the color palette.

1

Select the appropriate colors from the primary colors, Fujifilm Advanced Green and Innovative Grey, according to the information you want to convey.

Fujifilm Advanced Green

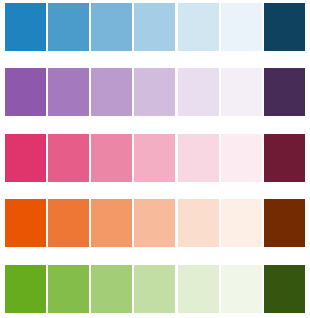

Innovative Grey

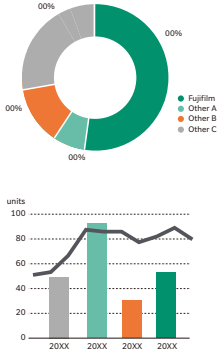

2

If it is difficult to express the information using the primary colors, then add appropriate colors from the secondary color palette according to the information you want to convey.

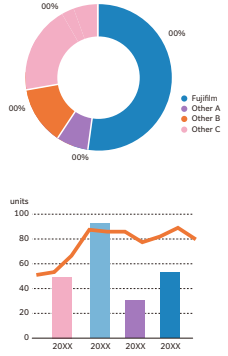

Secondary colors

Incorrect usage:
No primary colors are used and only secondary colors are used.

5-2-2 Color Palette: Secondary Colors Multi-color Examples

Appropriate colors may be selected from the primary colors and secondary colors to show multiple items.

Select appropriate colors for the contents, such as Fujifilm Advanced Green for our company's information and primary and secondary colors for other companies' information.

For most applications, the result will be charts and graphs in a combination of primary and secondary colors.

The shading shown on the previous page can also be used.
