Value from Innovation

Official Website Basic Guidelines

Version 2.4.0

Published by FUJIFILM Holdings Corporation, Corporate Communications Division, Advertising Group

Introduction

In recent years, Internet information has become increasingly important in customers' purchasing behavior. In addition, technological advances have made it possible to make more active use of websites, such as 1 to 1 marketing that uses the behavior history of visitors to websites.

The official website is **an Internet-based information platform that provides comprehensive "Fujifilm Group" information**. It plays a variety of roles, with the following 2 particularly important roles.

1. Appeal of Fujifilm brands
2. Contributing to the businesses as a digital marketing platform

In order to fulfill these roles and ensure a certain level of quality at various official websites, FH CC Advertising Group has developed 2 main official site guidelines.

Fujifilm Official Website Guidelines (This document): Define concepts and designs common to all official websites.
Guidelines by sites: Stipulate the structure and specific rules for each type of site.

Everyone involved in the operation and administration of official websites should comply with these guidelines and strive to maximize the effectiveness of their respective official websites.

1-8 FUJIFILM Business Innovation | Subsidiary Site

[Objectives and Roles]

Disseminate the latest product information and corporate information of FUJIFILM Business Innovation's affiliated companies.

[Target]

Customers, prospects, business partners,

Job seekers, journalists and employees

TBD

[Domain]

www.fujifilm.com/[Company name abbreviation]

[Infrastructure/CMS]

Official Web Cloud、CAMP

[Site Management Department]

Each subsidiary

2 Concept

2-1 Simple & Smart

Simple & Smart

1) Platform

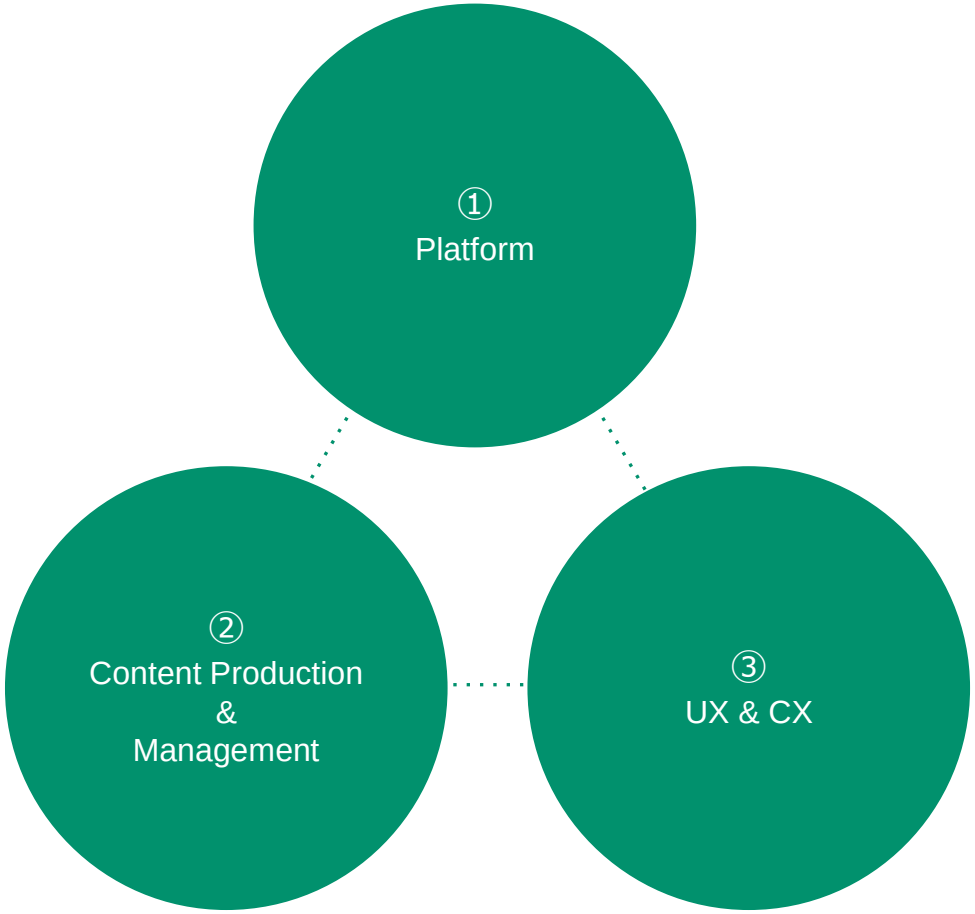

Simple & Smart integrated platforms supporting all official websites

2) Content production & management

Simple & Smart content creation along with the Fujifilm brand

3) User experience & customer experience

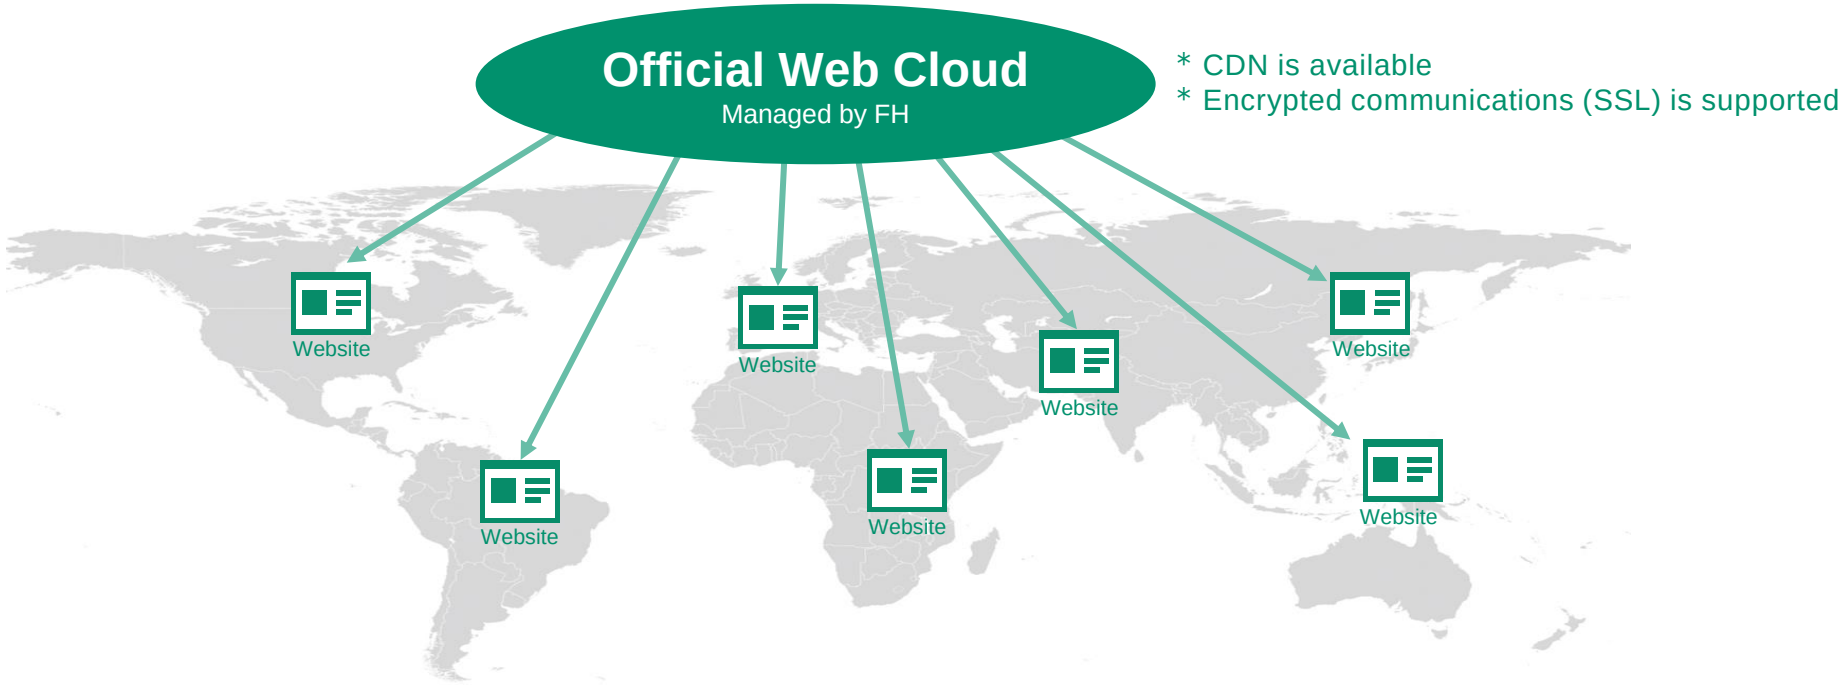

Providing Simple & Smart experience to visitors

2-1-1 Platform

All Fujifilm Group official sites are constructed on the integrated infrastructural system “Official Web Cloud”.

By centralizing the management of infrastructure systems, we can solve problems related to infrastructure systems common to all official sites, such as stable operation and security measures.

2-1-2 Content production & management

Fujifilm Group has many official websites, and they are managed and operated by many people. Many efforts are required for all these people to understand and comply with design rules to promote the Fujifilm brand.

CAMP, which produces and manages content for official websites, provides a variety of templates and design parts that enhances the Fujifilm brand.

By combining these established templates and design parts, anyone can easily create a variety of content adapted to the Fujifilm brand.

2-1-3 User experience & customer experience

Visitors visits our website with purpose. At the same time, we are also spreading information on our website with a view to achieve our purpose. However, if we make the site difficult to see from a visitor to fulfill our own objective of disseminating information, it will have major disadvantages from a medium to long-term perspective, such as reducing the number of repeat visitors and the ability to attract customers.

The official website is intuitively easy for visitors to understand, considering the objectives of Fujifilm Group’s dissemination of information.

We can increase the site experience value of visitors by streamlining the process of achieving visitors' site visits.

3 CAMP

3-1 What is CAMP?

CAMP (Content Allocation & Management Platform) is a content management system that operates and manages Fujifilm's official websites. CAMP has the following administrative functions:

Content Management	Function to create pages and manage the workflow to publish the pages.
Website Management	Function to manage basic design, languages and other site settings of each site
User Management	Function to register user account and manage user permission

*For details about CAMP, refer to CAMP Basic Design in Fujifilm Websites Guidelines & Manuals.

4 Basic design

4-1 What is basic design?

Design rules secured in CAMP

Fujifilm official websites are designed in accordance with the Fujifilm Group Brand Guidelines. Therefore, each of the templates and design parts available in CAMP is designed with consideration of the brand.

To create content in line with the Fujifilm brand, make sure to use the templates and design parts provided in CAMP when creating pages.

4-2 Brand element

Green Gradation Line and Clear Space

In official websites, brand element (green gradation line and clear space) is applied based on below criteria.

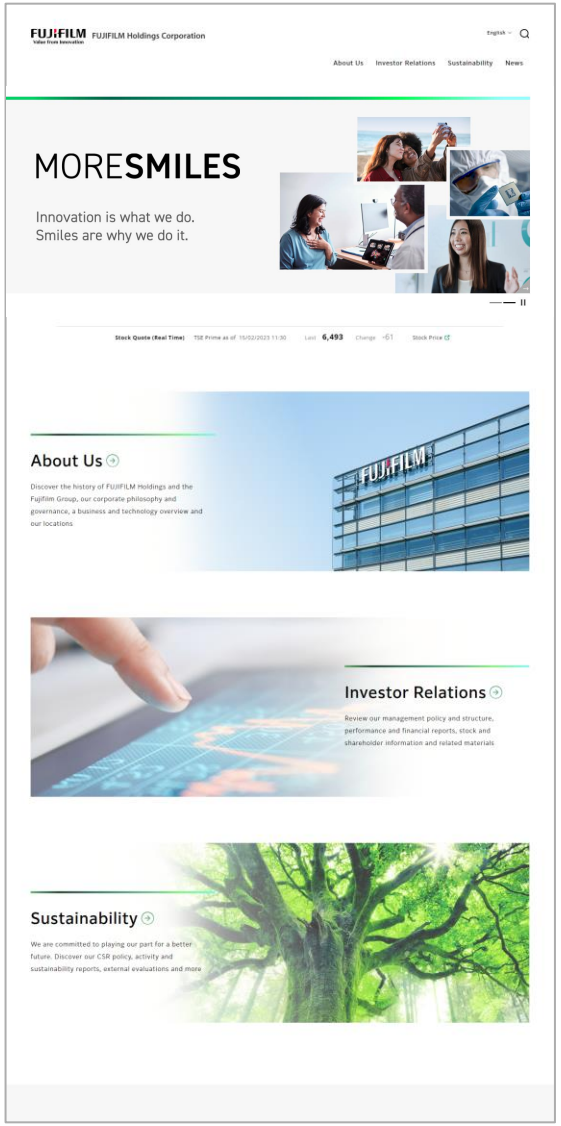

Target page	Green Gradation Line	Clear Space
Home page of each site	Mandatory *with motion	Mandatory
Other pages of each site	Optional	Mandatory

4-2 Brand element

Example

PC Home page

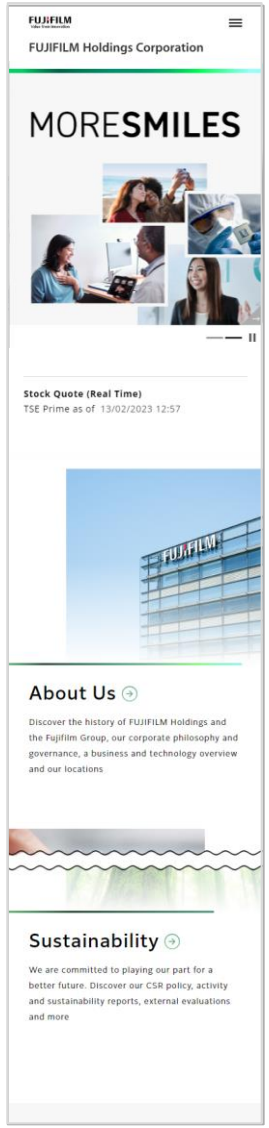

Green Gradation Line with motion
Mandatory

Clear Space
Mandatory

SP Home page

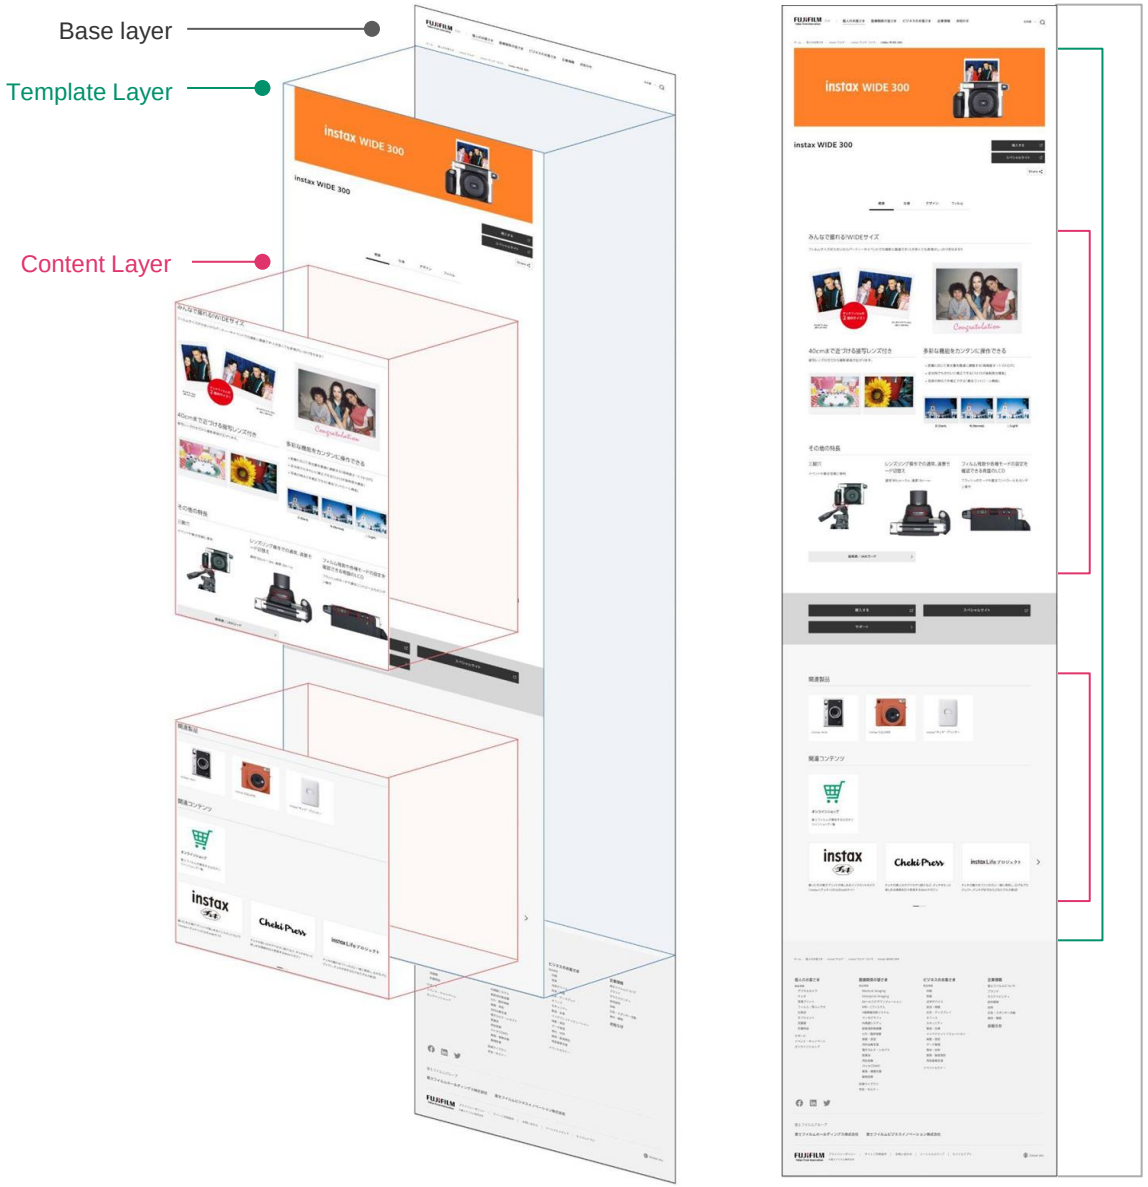

Green Gradation Line with motion
Mandatory

Clear Space
Mandatory

4-3 Area definition

The structure of each page is defined in 3 layers.

Base layer

A layer that contains elements that are used consistently across sites, such as global headers and global footers.

Template layer

A listing element defined for each content type.

Content layer

Areas in which specific elements are posted.

Editors can create a combination of "paragraphs" within this area.

4-4 Layout design

Responsive design and break point

To maintain the integrity and regularity of the visual layout, we have adopted a grid system in which the content width is divided into 12 columns. While viewport is only set at 768px for design purposes, it is designed to be adaptive for many devices, including tablets, by setting the content width itself to be liquid (variable width) and the maximum width.

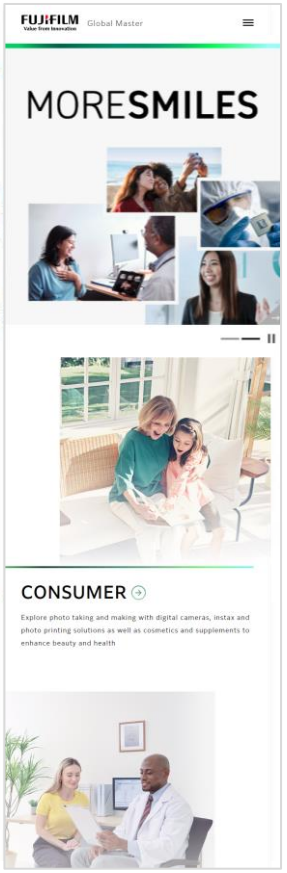

4-4 Layout design

Responsive design and break point

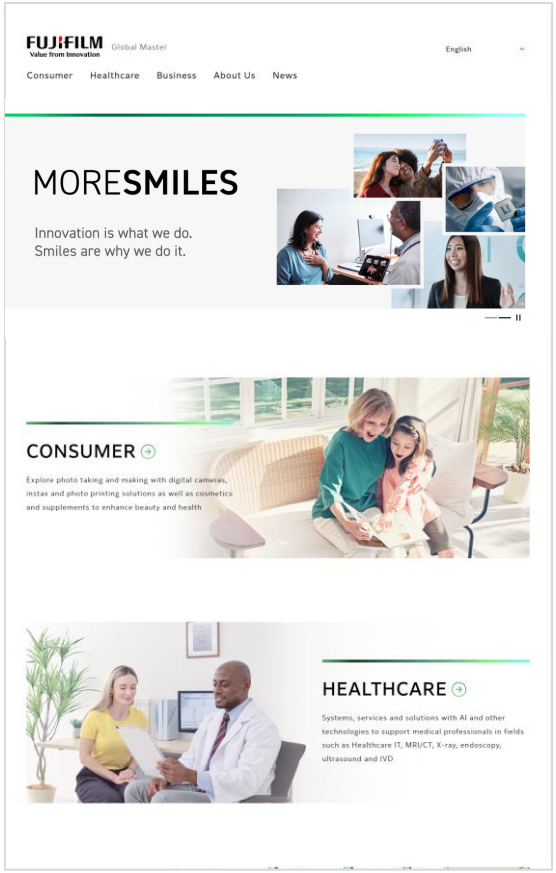

Below image explains how the site looks at each break point.

Starting at 768 px (window width), the appearance switches suitable for Smartphone, Tablet and PC.

Window width < 768

768 ≦ Window width < 1280

1280 ≦ Window width

4-5 Basic style: Typography

Specified font: Latin Script

For Latin Script in official websites, “Clarimo UD PE” is adapted.

If this paid font is not available and it is difficult to obtain it, use the substitute typeface installed on your PC (e.g., Arial or another san-serif typeface).

Font / Weight	Clarimo UD PE	Clarimo UD PE Narrow
Light	ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 1234567890&?%	ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 1234567890&?%
Regular	ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 1234567890&?%	ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 1234567890&?%
Medium	ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 1234567890&?%	ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 1234567890&?%

4-5 Basic style: Typography

Specified font: Japanese

For Japanese font in official websites, “UD Shin Go” is adapted.

If this paid font is not available and it is difficult to obtain it, use the substitute typeface installed on your PC (e.g., Meiryo).

Font / Weight	A-OTF UD新ゴ Pr6N UD Shin Go JIS2004	A-OTF UD新ゴコンデ90 Pr6N UD Shin Go Conde90 JIS2004

4-6 Basic style: Icon

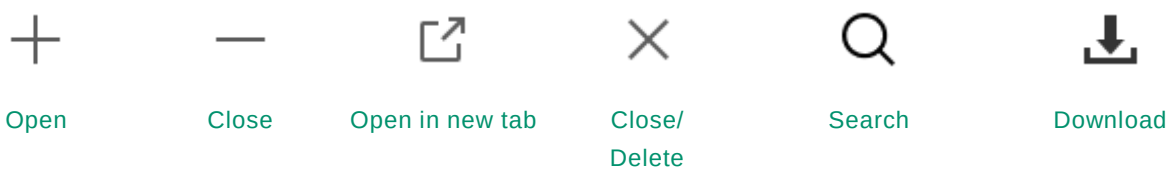

Specified icons

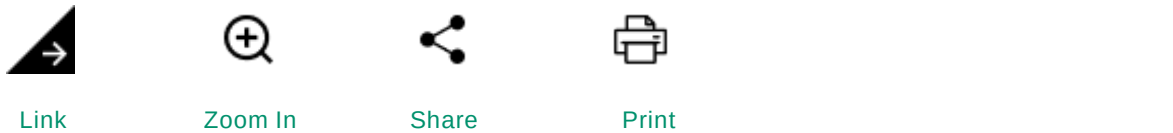

We provide icons as necessary to assist users in their uninterrupted UI operations and website browsing.

The icons are broadly classified into the following 2 categories. be careful not to use the same icons in different applications.

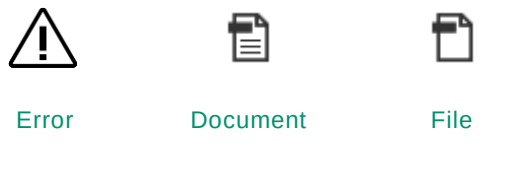

Icons that suggest the function or behavior	Icons that appeal to the content

4-7 Basic style: Color

Contrast ratio

Fujifilm official website aims to achieve the AAA level criteria of contrast ratio as defined in W3C's "WCAG 2.2" (Web Content Accessibility Guidelines) while complying with Fujifilm's corporate brand.

The diagram below shows a set of colors based on the contrast ratios.

Contrast ratio of background and text color to achieve “AAA” criteria

Normal Text
Character size: less than 24px (regular) or less than 18px (bold)
→ **7 : 1** or over

Large Text
Character size: more than 24px (regular) or more than 18px (bold)
→ **4.5 : 1** or over

4-7 Basic style: Color

Specified colors

Colors that are commonly used on official websites are defined as in the right.

The colors on official websites are adjusted from advanced green (corporate color) and considered the contrast ratio from the viewpoint of accessibility based on WCAG 2.2.

5 Creative rules

5-1 What are creative rules?

Rules that creators should consider

This chapter explains design rules for production, such as lead designs, images and writing.

Without considering for design rules, the site will not be able to appeal the brand consistently, and its quality cannot be guaranteed. Please understand the basic design, adhere to the guidelines in this chapter, and try to create content that is suitable for the Fujifilm Group official site.

5-2 Important checklist before publishing content

Please make sure to check the content for the following points before publication:

Check that the content…

(1) does not violate the Pharmaceutical Affairs Act, other laws and regulations, or public morals

(2) does not infringe third party copyrights, author's moral rights, trademark rights or any other intellectual property rights

(3) does not infringe any third party's right to privacy

(4) does not contain undisclosed information, including confidential information and insider information of Fujifilm and other companies

(5) does not contain any libel or slander

(6) does not damage any third party's reputation

(7) does not predict, indicate, lead to or encourage any criminal activity

(8) does not constitute or encourage sexual harassment

(9) does not lead to or encourage any dangerous behavior

(10) does not have any relationship to political or religious activities

(11) has not been borrowed without permission from other media such as other websites, books, magazines, or advertisements

(12) is not false or does not contain any misinformation

(13) does not correspond to indecent material or child pornography

(14) does not encourage buying or selling sexual services

(15) does not encourage the use of stimulants, narcotics or any other illegal drugs

(16) is not falsely using someone else's name

(17) does not encourage or promote inappropriate sexual relationships

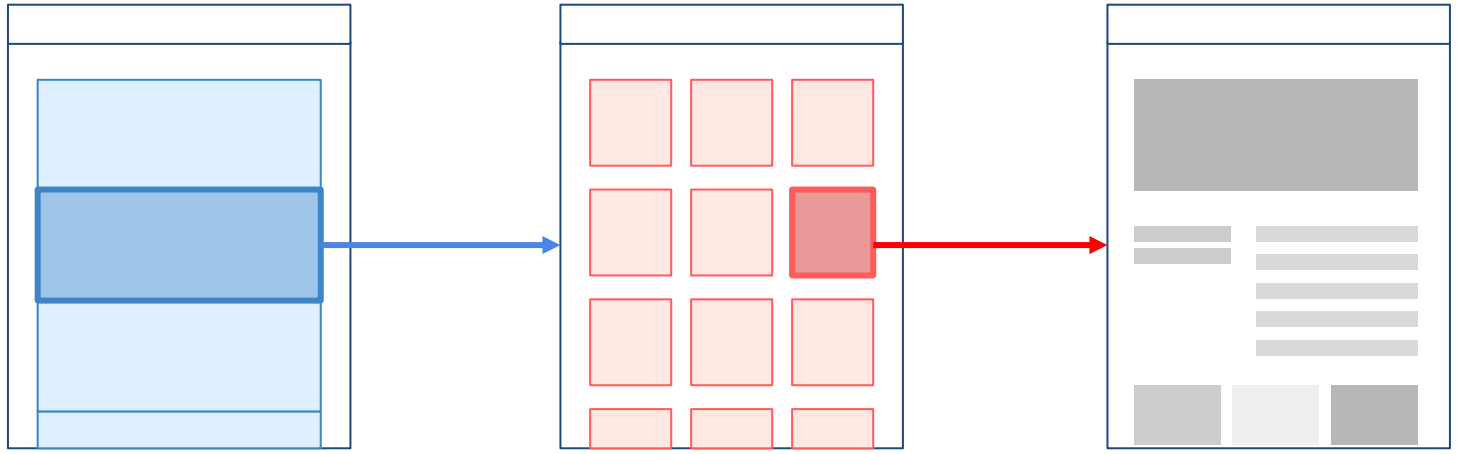

(18) is not in any way inappropriate as a message from Fujifilm

5-3 Concept of conductor design

Basic Policies for a visitor’s flow

Top level pages, such as the home page of the site and the main categories, are considered as the index (hub) pages for visitors to find the content they want to visit.

Specific product and service information and promotional information should be created in lower tiers of those main pages.

Home page of the site

Considered as the index for visitors to select a category which they want to visit within the site
*Do not include specific information or offers of each category

Home page of main categories

Considered as the index for visitors to select a content which they want to visit within the category
*Do not post detailed information or offers of each content

Content page

Visitors can view specific/detailed information of the content and offers

5-4 Guidelines for images

Guidance

- Be aware of the photo style stipulated in the Fujifilm Group Brand Guidelines when shooting and purchasing images for official websites.
- Use the basic colors and identification colors stipulated in the Fujifilm Group Brand Guidelines for illustrations posted on the website and consider accessibility when creating them.
- It is prohibited to add unnecessary white space around images solely for the purpose of adjusting their placement (such as aligning them to the right or left) or the positioning of text relative to the images.

5-4 Guidelines for images

Copyright of images

Be sure to confirm the copyrights (expiration date of licenses, portrait rights, etc.) before using the image on official web sites.

* Be careful to follow copyrights when copying image from the Global Master, when using them in different sites.

OK (purchased)

BAD (pre-purchase sample with a water mark)

5-4-1 Image creation rules

［1-1-1］Content type Hero image (1st image) - PC

This image is intended to symbolize the content of the page.

Creation Size (Recommended) : 1400*438

Aspect ratio : 700:219

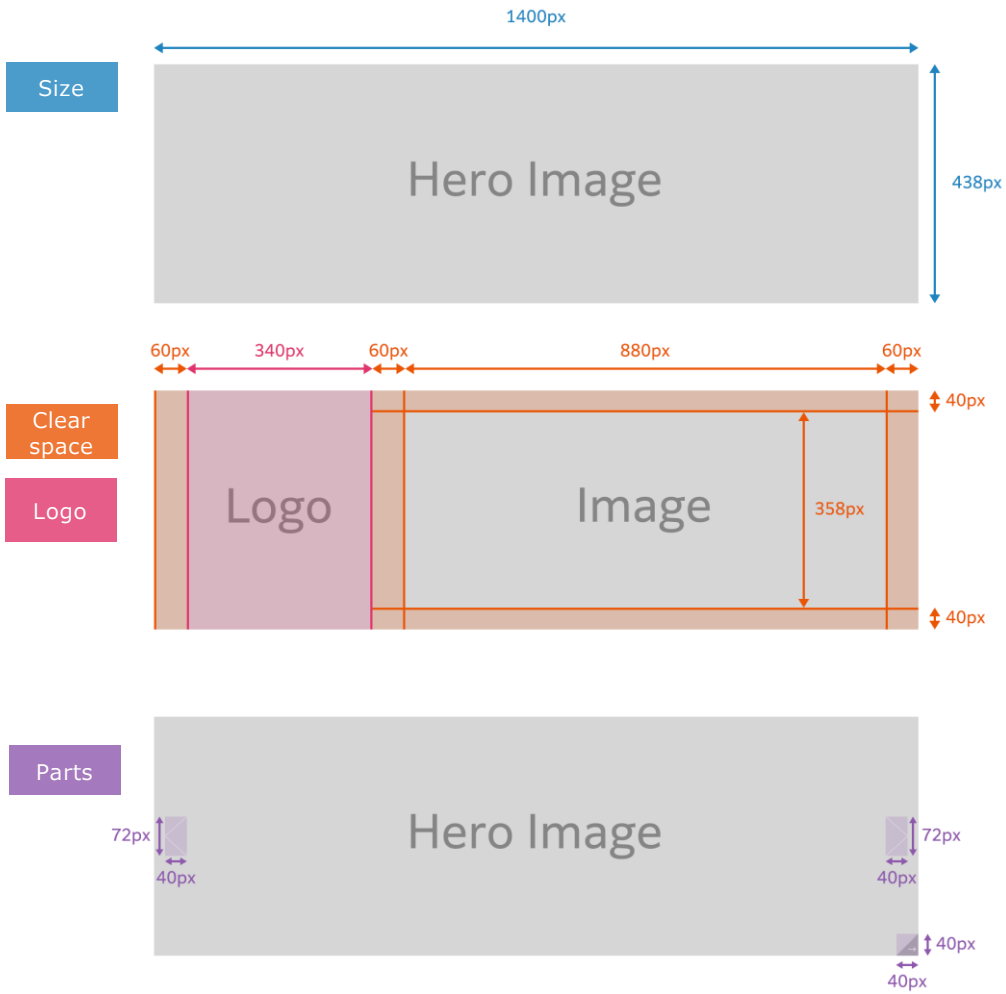

Margin : None

Image Riding Parts : Yes

Background : None

Text :
No text information is basically allowed except for product logo. If it is inevitable to include text elements, such as in response to Advertising Laws or Pharmaceutical Affairs Laws, please pay attention to the visibility of the text and use appropriate sizes and colors.
Safe Area - Please do not post any major information in the designated area (see the diagram on the right).
Logo Area - If you wish to place a logo, please place it within the designated area (see the diagram on the right). However, if the logo becomes significantly smaller, you can place it beyond the specified range up to the center of the image.

Borderline : None

* For “About Us” specific hero image creation rules, see Country Site Guidelines.
* For Hero image creation rules specific to Subsidiary sites, see Subsidiary Site Guidelines.

5-4-1 Image creation rules

[1-1-1] Content type Hero image (1st image) - SP

This image is intended to symbolize the content of the page.

Creation Size (Recommended) : 750*750

Aspect ratio : 1:1

Margin : None

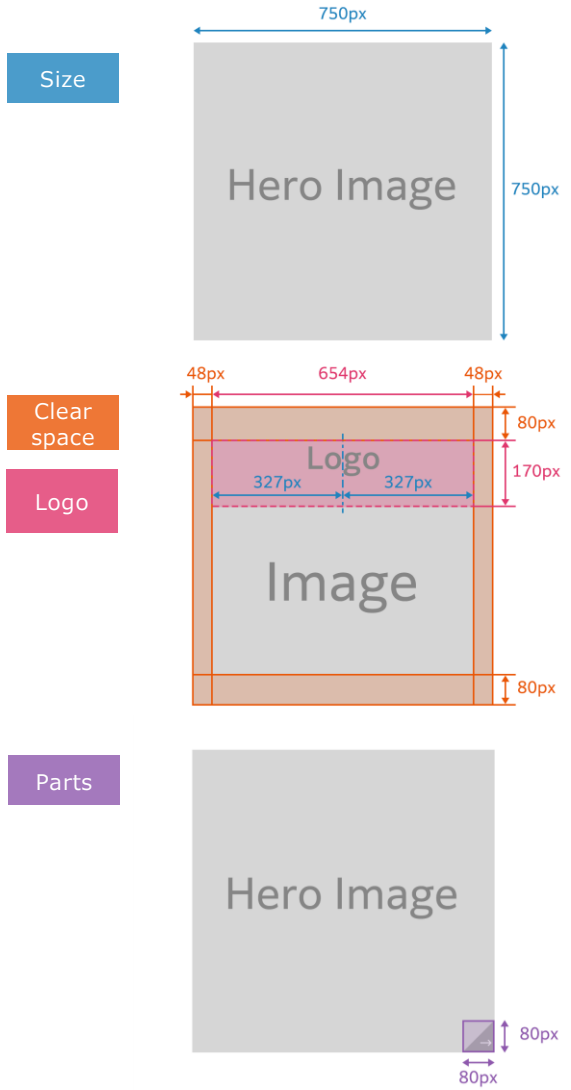

Image Riding Parts : Yes

Background : None

Text:
No text information is basically allowed except for product logo. If you are forced to include text elements, such as in response to Advertising Laws or Pharmaceutical Affairs Laws, please pay attention to the visibility of the text and use appropriate sizes and colors.
Safe Area - Please do not post any major information in the designated area (see the diagram on the right).
Logo Area - If you wish to place a logo, please place it within the designated area (see the diagram on the right). However, if the logo becomes significantly smaller, it is possible to exceed the limit by up to half of the image.

Borderline : None

* For About Us specific Hero image creation rules, see Country Site Guidelines.
* For Hero image creation rules specific to Subsidiary sites, see Subsidiary Site Guidelines.

5-4-1 Image creation rules

［1-1-2］Content type Hero image (After the 2nd image) - PC

This image is intended for campaigns related to the content of the page or promotions that lead to external sites.

Creation Size (Recommended) : 1400*438

Aspect ratio : 700:219

Margin : None

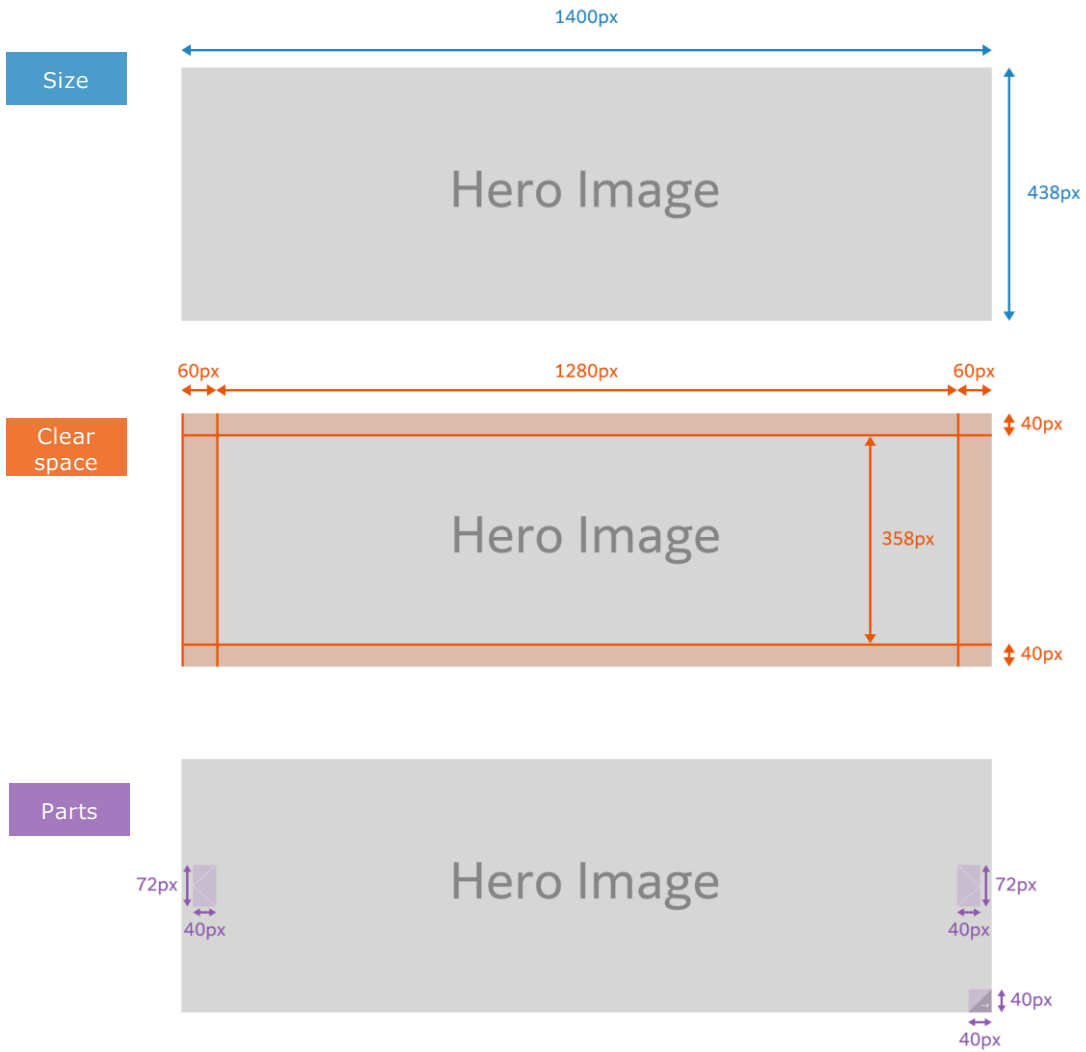

Image Riding Parts : Yes

Background : None

Text :
When posting text elements, please make sure that the text does not appear on the main elements of the photo. Also, pay attention to the visibility of the text and use appropriate size and color. Please limit the amount of text to the amount that can be read while the carousel is running.
Safe Area - Please do not post any major information in the designated area (see the diagram on the right).

Borderline : None

* For “About Us” specific hero image creation rules, see Country Site Guidelines.
* For Hero image creation rules specific to Subsidiary sites, see Subsidiary Site Guidelines.

5-4-1 Image creation rules

［1-1-2］Content type Hero image (After the 2nd image) - SP

This image is intended for campaigns related to the content of the page or promotions that lead to external sites.

Creation Size (Recommended) : 1400*438

Aspect ratio : 700:219

Margin : None

Image Riding Parts : Yes

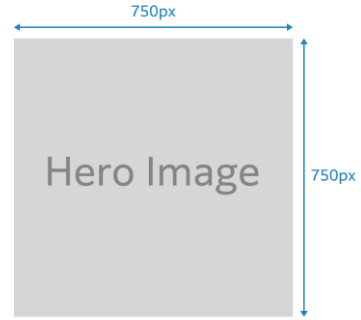

Background : None

Text :
When posting text elements, please make sure that the text does not appear on the main elements of the photo. Also, pay attention to the visibility of the text and use appropriate size and color. Please limit the amount of text to the amount that can be read while the carousel is running.
Safe Area - Please do not post any major information in the designated area (see the diagram on the right).

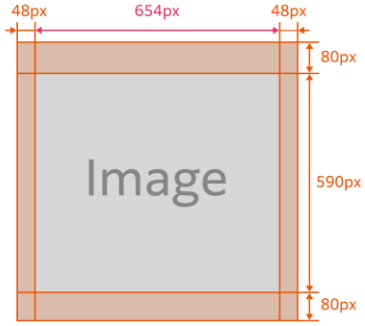

Borderline : None

2-2

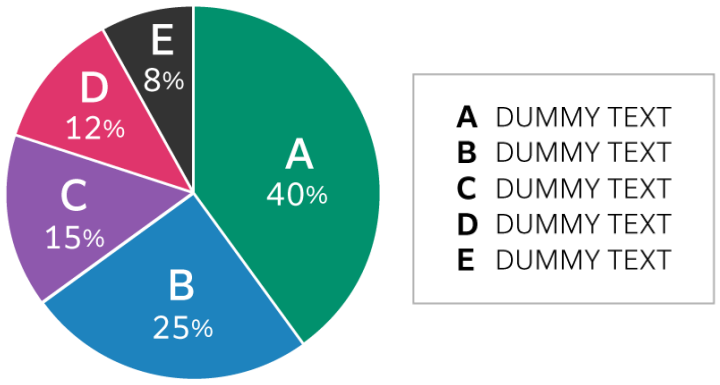

5-4-1 Image creation rules

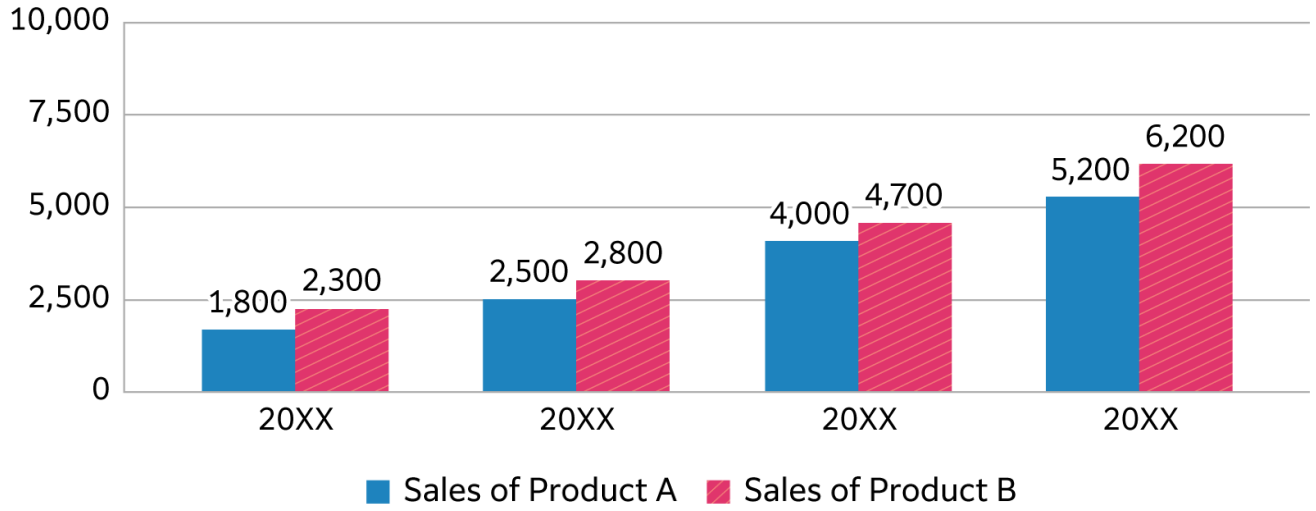

［2-2］Graphical image, charts

To create a graphical image using charts, be mindful of using color combinations that are easily distinguishable and ensure that the content of the graph can be understood even if the colors are not discernible.(See 4-7. Basic Style: Color: Contrast Ratio for more information on the contrast ratio criteria in WCAG 2.2.)

Examples of creating graphs that do not rely on color:

- Clearly state the legend and numbers directly on the graph
- Add boundary lines between elements
- Apply patterns to one of the adjacent graphs

5-4-1 Image creation rules

[3] Banner

Creation Size (Recommended) :
528*297

Aspect ratio :
16:9

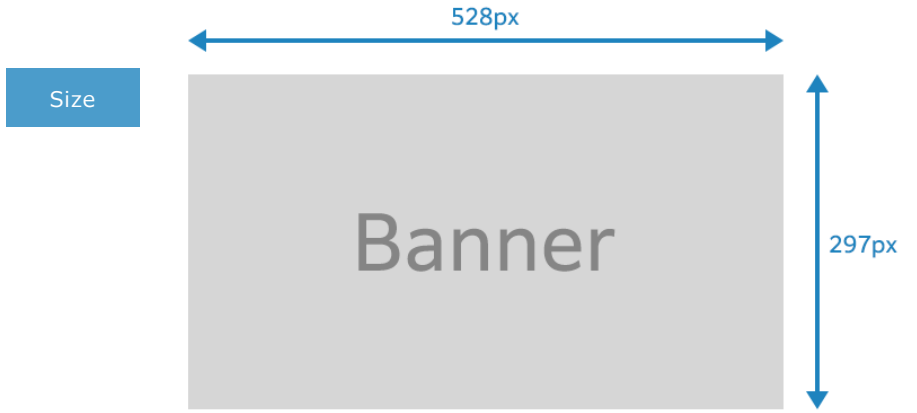

Margin :
None

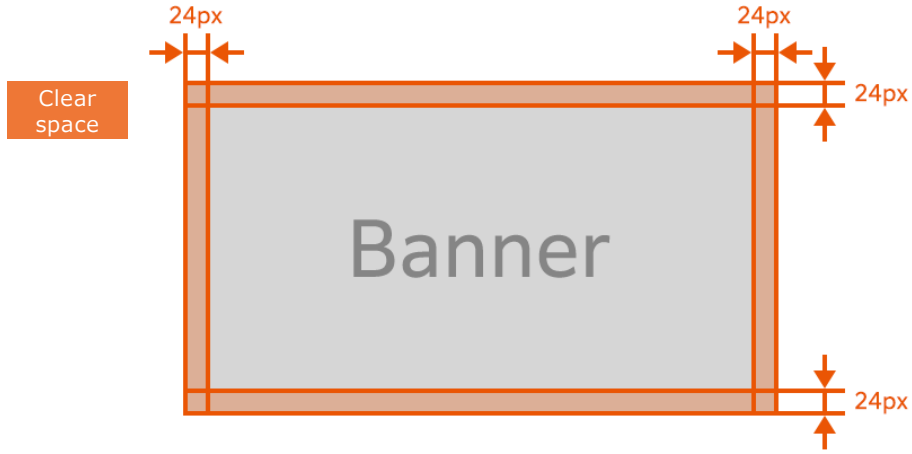

Image Riding Parts :
None

Background :
None

Text :
Clear space
- Do not include text information in specified areas

Border line :
No border (leave no border even on a white background because of shadow shown in the paragraph)

5-4-1 Image creation rules

［4］Attribute icon Image

Creation Size (Recommended) :
64*64

Aspect ratio :
1:1

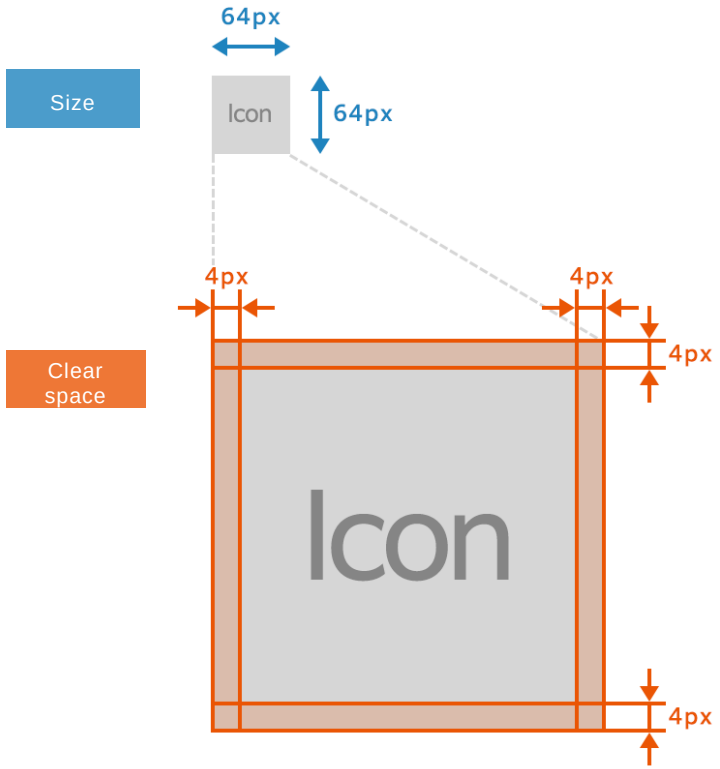

Margin :
None

Overlayed Parts :
None

Background :
None

Text :
Recommended Size:24px | Minimum Size:12px
Clear space
- Do not include text information in specified areas.

Borderline :
With a minimum of 2px if a line is included

5-5 PDF file

When posting PDF files, ensure that they are securely configured to prevent unintended edits*. In doing so, allow screen readers to read the content to enable recognition of textual information by assistive technologies such as voice readers.

* Excluding cases where visitor edits are required due to the nature of the document

5-6 File naming convention

Basic rules

- Make sure that file names don’t become too long
- The file names can be alphabetic (in small letters), numbers, hyphens (-), and underscores (_)
- Hyphen is used to connect words
- Put identifier if needed
- Add "_sp" before the extension when you register the SP version of the Image.

Basic format

Prefix + Underscore (_) + [Identifier + Underscore (_)] + [Serial No. (2 digits)] + [Dots (. +[File Extension]

* The sequence number shall be the sequence number for each prefix within the page.

5-6 File naming convention

Prefix

An example	Details	Example of application
thumb	Thumbnail	thumb_01.jpg
pic	Photo	pic_related-content_02.jpg
bnr	Banner	bnr_reader8_01.gif
fig	Figures, illustrations, tables	fig_sample_01.jpg
icn	Icon	icn_pdf_01.gif
logo	Logo	logo_corp_01.gif

Identifier

An example	Details	Example of application
new	Indicates a new (content).	icn_new_01.png
feed	Indicates the feed (content).	icn_feed_01.png

5-6 File naming convention

Media-based image file

Please name an image file according to the following policy, since it requires a unique name when searching for it.

- Product Image: [Brand name]_ [Any name] _[File Serial Number]. [Extension] (e.g., instaxsq10_spec_01.jpg)
- About Us: [Category Name]_ [Page Name]_ [Prefix]_[File Serial Number]. [Extension]
- News: news_[Any name] _[File sequence number]. [Extension]
- Image across categories: [Category name or group name]_ [Any name]_[File sequence number]. [Extension]

Downloadable File

For File that may be downloaded, such as File using B03_download/B04_linkfile of a component or PDF in a table, please consult with the content owner and set a File name of your choice.

- About Us: [Category name]_ [Page name] _ [Any Name (e.g., present File name)]. [Extension]

  * If requested, [Any name (e.g., the present File name)]. [Extension] is acceptable.
- News (Press Image ZIP): news_[Any name] . [Extension]

5-7 Writing guidelines

For label and sentences such as navigation posted on the website, select terms that are easy for visitors to understand based on generic terms and suitable for Fujifilm brand.

Refer to the following for the word selection policy.

1. Be careful not to make your sentences too long so that you can convey your message concisely and directly.
2. Use expressions that show respect for visitors. Avoid speaking in a tone that suggests teaching or preaching to visitors.
3. Avoid expressions that are too familiar or overly polite.
4. Using company terminology is prohibited.
5. Avoid using foreign languages as much as possible.
6. Consider replacing difficult expressions such as industry jargon and abbreviations with common, easy-to-understand wording.

* For FUJIFILM Holdings sites and Fujifilm sites, refer to “Wording Guidelines” on the Fujifilm Group Website Guidelines & Manuals for terminology.

5-7 Writing guidelines

SEO

SEO (Search Engine Optimization) refers to a collection of techniques aimed at ranking a website higher in search engine results, such as Google. From an SEO perspective, make sure to consider the following points:

- Conduct research to identify the keywords that your target users are using to search, including patterns of using multiple keywords. Use these keywords naturally, primarily in headings and meta information*1. Avoid using keyword-stuffed and unnatural sentences that may harm trust from search engines.
- Properly set heading levels and meta information, considering HTML markup.
- Provide information that meets the needs of your target audience in a clear and understandable manner. Avoid excessive use of demonstrative pronouns.
- Ensure uniqueness and originality of the content to avoid duplicating descriptions from other sites.
- Keep the web page updated with the latest information.
- Set appropriate alt attributes for images to ensure search engines can accurately recognize and display them in image search results*2.
- Clearly indicate the source if you have references to gain visitor trust.
- Utilize web analytics tools even after publication to periodically review and improve content if necessary.

*1 For more details on meta information, refer to 5-7 Writing guidelines: Meta information.

*2 Properly setting alt attributes also enhances accessibility. For more details on accessibility, refer to 6. Accessibility.

5-7 Writing guidelines

Meta information

Meta information serves to accurately convey information about each web page. It is not visible to visitors but is utilized by search engines and social media platforms. The main types of meta information and their guidelines are as follows.

Item	Summary	Description Guidelines
title	“title” is displayed in search engine results and browser tabs, making it important for SEO purposes. It may also appear when sharing a website on social media.	● Setting a concise phrase that effectively represents the page content to be displayed in search results is essential. Including keywords that the target users would use during their search can also be beneficial for SEO purposes.
meta description	“meta description” may appear below the title and URL in search engine results. It is also important for SEO purposes.	● Make sure to provide content that is engaging, relevant to the interests of your target users, and easily understandable for them when considering its display in search results. Additionally, include keywords that your target users would likely use during their search. ● There is no specific character limit, but keep in mind that the text may be automatically truncated based on the width of the displaying device. Considering this, set concise phrases that accurately represent the content of each page.
OGP image	OGP (Open Graph Protocol) images are displayed when sharing a website on social media.	● Set images that appropriately represent the content of the page and consider the interests and preferences of your target audience.
meta keywords	“meta keywords” are designed to convey the page's content to search engine crawlers.	● In recent years, search engines have evolved to the point where they can read and understand page information beyond meta keywords. As a result, it is now discouraged to set meta keywords on official websites.

5-7 Writing guidelines

Annotations

1) For a particular word or sentence

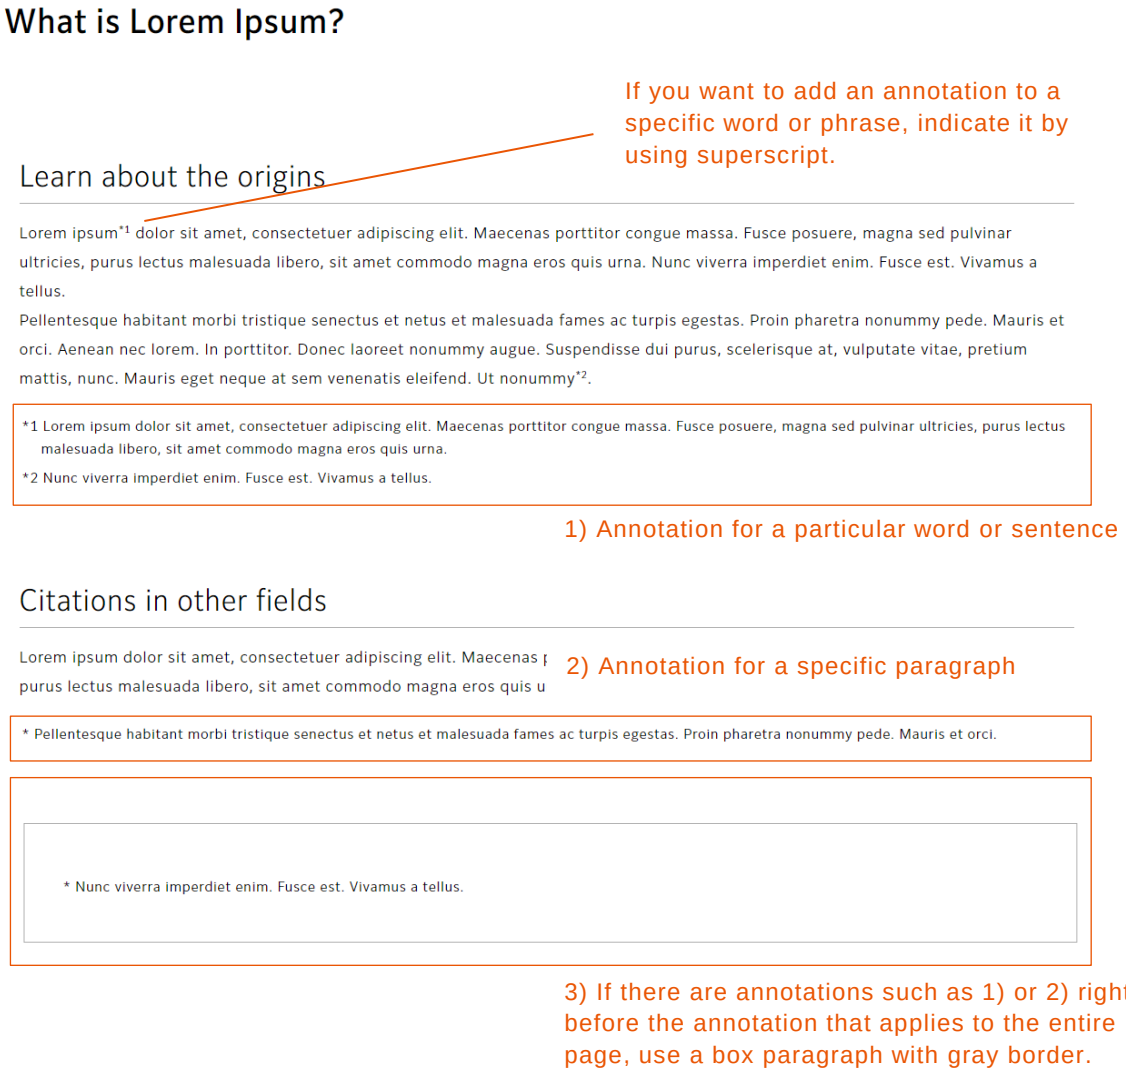

- Annotation numbers should be written in the format "*1 " or "*2 " (asterisk + number + space). Do not use "*", "**", or "***" for numbering.
- Annotation numbers for individual words should be written as superscripts right after the word.
- Annotation numbers for sentences should be written as superscripts at the end of the sentence, just before the punctuation mark.
- Annotation text should be included as a section at the end by using "A04_paragraph". Describe it as a bulleted list (unordered list) and apply the "Commentary" style.

2) For a specific paragraph

- Annotations should be written in the format "* " (asterisk + space).
- Annotation text should be included as a section at the end by using "A04_paragraph". Describe it as a bulleted list (unordered list) and apply the "Commentary" style.

3) For the entire page

- Annotations should be written in the format "* " (asterisk + space).
- Annotation text should be included at the end of the main area of the page by using "A04_paragraph". Enter it as a bulleted list (unordered list) and apply the "Commentary" style. However, if there are preceding annotations such as 1) or 2), the annotation should be highlighted using a gray-bordered emphasis box (E01/E02/E04).

6 Accessibility

6-1 Accessibility

To comply with the success criterion of WCAG (Web Content Accessibility Guidelines 2.2, developed by the WAI (Web Accessibility Initiative), an organization within the W3C (World Wide Web Consortium), we aim to create a website so that everyone using the site can easily obtain the information they need.

Web Content Accessibility Guidelines （WCAG） 2.2
https://www.w3.org/TR/WCAG22/

Basic Policy

Degree of responsiveness

Partially compliant with WCAG2.2

Success Criterion

Achievement Criteria for Grade A (31 items) and Achievement Criteria for Grade AA (24 items)

6-1 Accessibility

Principles

[1] Alternative text (alt)

For non-text contents such as images and videos, set alt text to make the content understandable to screen-reader users.
However, refrain from setting alt text in below cases.

1. The same information is already described as the image caption
2. The image is used as part of the design (Heading background image, decoration line, etc.) and does not need to be specifically described

Alt text (example)

Taro Fuji, FUJIFILM Corporation

*The alt text is not displayed visually on the page but is read aloud when using a screen reader.

Taro Fuji,
FUJIFILM Corporation

Example where alt setting is unnecessary

When caption is set to the image, alt text is unnecessary.

6-1 Accessibility

[1] Alternative text (alt) (Continued)

3. For figures, graphs, videos, etc., if explanatory text is written around the figure/graph/video and the meaning of the content is fully understandable even the alternative text is not set. (Setting the alternative text may cause duplication when using the screen reader.)

WCAG 2.2 Relevant success criteria
1.1.1 Non-text content (Level A)
https://www.w3.org/TR/WCAG21/#non-text-content

Example where alt setting is unnecessary

..... This increased sales by 20%.

If the same information as the image is described in the surrounding text as described above, alt setting is not necessary.

6-1 Accessibility

[2] Image creation

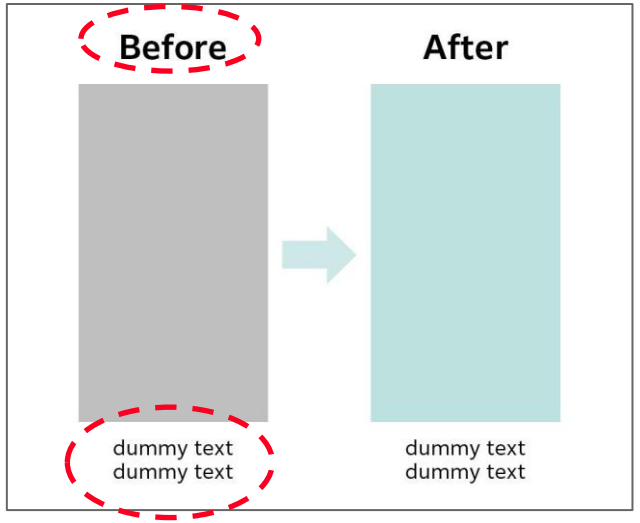

1. Text information should not be embedded in images as much as possible. As text written in image is not readable for screen-reader users, avoid embedding heading or descriptive text in the image and write down the text outside the image.

WCAG 2.2 Relevant success criteria
1.4.5 Images of text (Level AA)
https://www.w3.org/TR/WCAG21/#images-of-text

2. For text information, ensure a 4.5:1 contrast ratio. For non-text information, ensure a 3:1 contrast ratio.

WCAG 2.2 Relevant success criteria
1.4.3 Contrast (minimum) (Level AA)
https://www.w3.org/TR/WCAG21/#contrast-minimum
1.4.11 Non-Text Contrast (Level AA)
https://www.w3.org/TR/WCAG21/#non-text-contrast

Bad example: Text is embedded to the image

Bad example: Insufficient contrast ratio

Text contrast ratio insufficient

Red: #C02E2E
Yellow green: #B9D974
Contrast ratio: 3.6:1

Contrast ratio of non-text element insufficient (drawn line)

Foreground color: # CA9593
Background color :#FFFFFF
Contrast ratio: 2.6:1

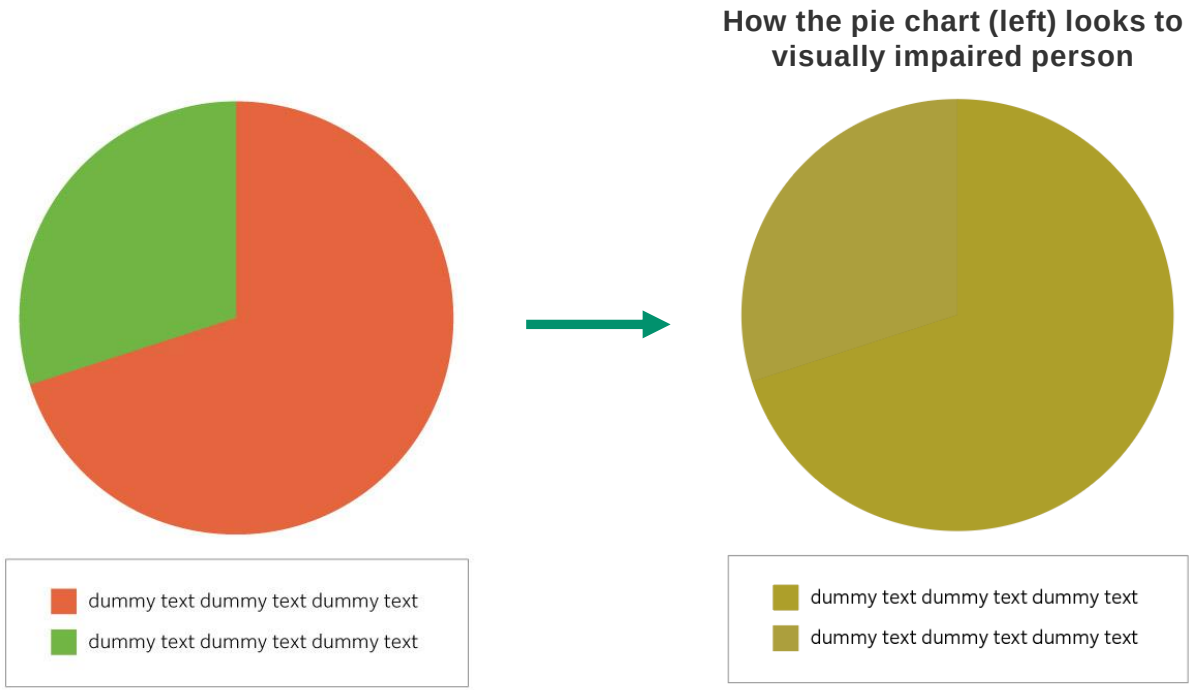

6-1 Accessibility

［2］Image creation (Continued)

3. For graph and chart, information should be communicated not only by color but also by visual cues (patterns, etc.).

WCAG 2.2 Relevant success criteria
1.4.1 Use of Color (Level A)
https://www.w3.org/TR/WCAG21/#use-of-color

Bad Example: Legends are conveyed only by color and close color gradation is used

Visually impaired person may find it difficult to distinguish colors, so visual cues other than color, such as brightness and patterns, are necessary.

*Refer to ［2-2］Graphical image, charts for proper way to create charts.

6-1 Accessibility

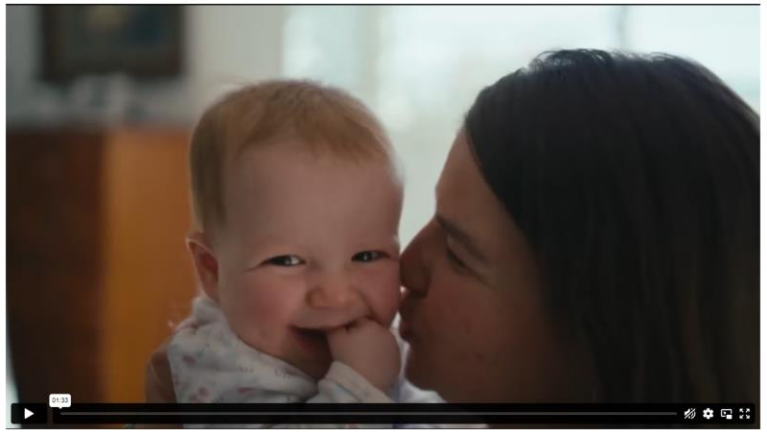

[3] Video

When including videos, output the title attribute in the HTML.

WCAG 2.2 Relevant success criteria

1.1.1 Non-text content (Level A)

https://www.w3.org/TR/WCAG21/#non-text-content

Example of HTML output for YouTube

<iframe class=“c-youtube-player” inview=“false” id=“EEtolzWAlKE25” frameborder=“0” allowfullscreen=“” allow=“accelerometer; autoplay; clipboard-write; encrypted-media; gyroscope; picture-in-picture; web-share” referrerpolicy=“strict-origin-when-cross-origin**” title=“Purpose Concept Movie / Fujifilm**" width="640" height="360" src="https://www.youtube.com/embed/EEtolzWAlKE?rel=0&enablejsapi=1&playlist=EEtolzWAlKE&loop=1&origin=https%3A%2F%2Fwww.fujifilm.com&widgetid=1" data-gtm-yt-inspected-11069774_13="true" data-gtm-yt-inspected-14="true" data-gtm-yt-inspected-21="true"></iframe>

Example of HTML output for Vimeo

<iframe src="https://player.vimeo.com/video/943872814?h=59202459ec&badge=0&autopause=0&player_id=0&app_id=58479" width="1280" height="720" frameborder="0" allow="autoplay; fullscreen; picture-in-picture; clipboard-write" **title=" Purpose Concept Movie / Fujifilm**"></iframe>

6-1 Accessibility

［4］ Markup

Make sure that each element in the content has an appropriate markup to properly communicate information regardless of the visitor’s device.

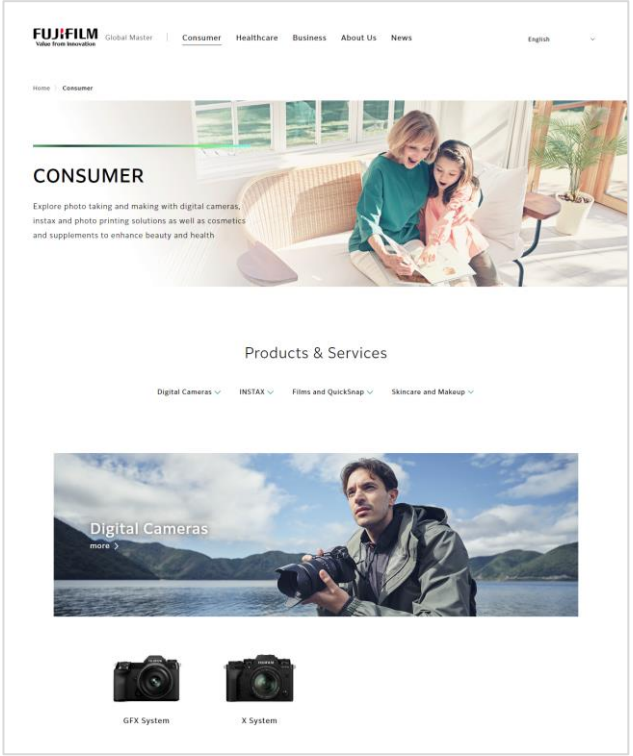

1. Set the heading levels with consideration for the correct hierarchical structure.

Incorrect setting

- h1-CONSUMER
  - h2-Products & Services
    - h3-Digital Cameras
      - h5-GFX System
      - h5-X System

Correct setting

- h1-CONSUMER
  - h2-Products & Services
    - h3-Digital Cameras
      - h4-GFX System
      - h4-X System

6-1 Accessibility

［4］Markup (Continued)

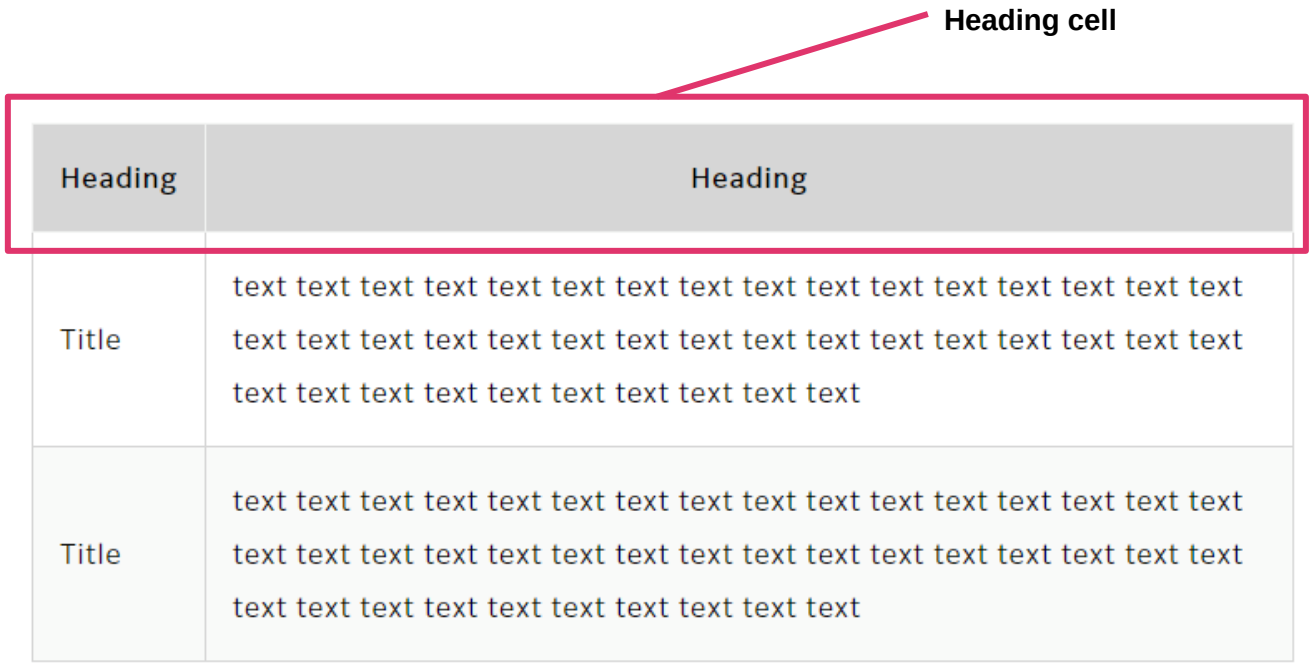

2. Always set a heading cell for a table element

3. Use style sheet to control prosperity

WCAG 2.2 Relevant success criteria

1.3.1 Info and Relationships (Level A)

https://www.w3.org/TR/WCAG21/#info-and-relationships

Heading cell
Heading
Heading
Title
text text text

6-1 Accessibility

［5］Buttons and Text links

When placing buttons or text links, ensure that the link label (the text set as the link) and the surrounding text provide a clear understanding of the content of the linked destination.

WCAG 2.2 Relevant success criteria

2.4.4 Link Purpose (In Context) (Level A)

https://www.w3.org/TR/WCAG21/#link-purpose-in-context

Example 1: The link label of the button indicates what kind of information is provided on the linked destination.

Example 2: The heading indicates what kind of information is provided on the linked destination.

7 Basic specifications

7-1 Operating environment

Web browser

Recommended

Google Chrome (Most recent version)

Semi-recommended

Microsoft Edge/Safari/Mozilla Firefox (Most recent version)

Other settings, etc.

On the assumption that application of style sheets and execution of scripts are enabled in the above web browser settings.

7-1 Operating environment

Recommended levels

	Recommended	Semi-recommended	Not recommended
Access to information	✓	✓	—
Design	✓	✓	—
Usability	✓	✓*1	—
Interactions	✓	—	×*2

*1 Some functions may not be implemented.

*2 Some functions may be deliberately omitted.

Unapplicable web browsers or use in environments that do not meet prerequisites

Even in an environment that does not satisfy the preconditions and is not subject to web browsing, as shown in the technical details (next section), implement the system in accordance with the technologies and specifications formulated by international standardization organizations, thereby ensuring that there is no obstacle to obtaining the information that is published.

7-2 Technical Specifications

Markup language	HTML Living Standard
Style sheet language	CSS3 (Compiled from SCSS)
Script language	ECMAScript 6 (Transpiled from TypeScript)
Framework	Vue.js（Vue3） ＊ jQuery is not used
Code format	**Character encoding:** UTF-8 **Line feed code:** LF **Compression:** Removal of white space（Obfuscation is not recommended）
Image file format	PNG/GIF/JPG/JPEG/SVG (According to the image's usage and condition.)

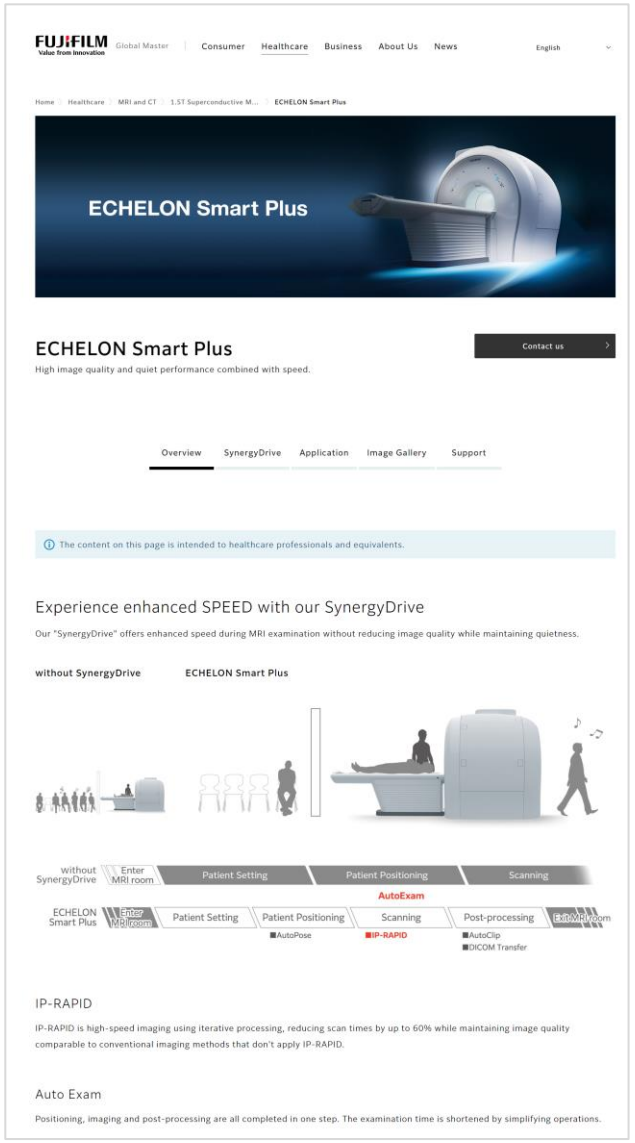

8 Others

8-1 Print layout

When printing the page, the main contents of the page will be printed. To make it suitable for use as a printed material, UI elements which are only used in the browser such as the global menu, search window, and other elements will be omitted.

*If the print function of the web browser is set to “shrink to fit on one page” or specified to a magnification ratio that matches the size of the paper to be printed, there is a possibility of the difference in the appearance from the browser due to a bug in the browser.

Web Browser

Print page

8-2 Content administration guidance

To ensure the freshness and reliability of information, unpublish content* after a certain period for outdated information or information that is no longer needed.

*In order to manage past publication history, it is not "deleted" but “unpublished".

Content	Period of Publication	Notes
Product information	1 year after the termination of shipment (service)	➢ If there are any specific circumstances, take it consideration to extend or shorten the publication period
Support information *Including product related software	3 years after the termination of repair service	➢ If there are any specific circumstances, take it consideration to extend or shorten the publication period
News release/ News topics	List: 3 years Article: 3 years	➢ For “Important News”, period of publication can be extended depending on the situation
Event/ Seminar	List: 1 year Article: 3 years	➢ The pages will be automatically unpublished on the official website after the period of publication.
Corporate information/ Other materials	Set individually according to objectives of the content	➢ If the period is long, consider to convert the past content into PDF

8-3 Description of website address

Follow the instructions below to indicate the address of official website.

Basic rule

Pattern	https://	www (Host name)	/ (slash) in the end	Examples	Notes
In media where the user is assumed to type the characters manually. (Business cards, brochures, etc.)	Do not set	Do not set	Do not set	fujifilm.com fujifilm.com/jp	
In media where the user is assumed to directly access the URL with their device (e-mail, website, etc.)	Set	Do not set	Set	https://fujifilm.com/ https://fujifilm.com/jp/	When setting "a href" for the link text, set the URLs with "https://" "www." and "/ (slash)" in the end.

- Language codes such as "ja" and "en" are not required. * However, if you want to link to a specific language, include the language code.
- For URLs to be set when creating QR codes, set the URLs with "https://" "www." and "/ (slash)" in the end.
